U.S. Navy Taps OutStart to Provide Personnel Training System

19 June 2006

[InDEFENSE](#)

OutStart, a provider of software solutions for learning and knowledge-sharing, announced an enterprise license agreement with the U.S. Navy's Naval Education Training Command (NETC) to use the OutStart Evolution LCMS (Learning Content Management System).

OutStart LCMS will be used for both land-based and ship/submarine-based training.

"Due to the scope and importance of the U.S Navy's responsibilities, it is critical they have the capability to deliver fast, reliable training solutions that ensure all Navy Personnel are fully empowered to perform their duties," said Massood Zarrabian, president and CEO, OutStart.

"It is an honor that a prestigious organization such as the U.S. Navy has chosen to take our business relationship to the next level," said Zarrabian. "OutStart's technology will enable the Navy to continue delivering quick, effective and cost-efficient training to Navy personnel, thus putting them in a position to succeed in their respective duties."

OutStart eKnowledge software offers formal and on-demand learning, knowledge sharing and community/expert collaboration solutions for customers including Empire BlueCross BlueShield, Tweeter, ING, Sara Lee, Steelcase, the U.S. Navy, Verizon, AgustaWestland and Unilever.
